

Pay quartiles (% of men and women in each pay quartile)

■ Men ■ Women

Proportion of men and women receiving a bonus

Pay and bonus

	Median	Mean
Difference between men and women		
Gender Pay Gap	15.5%	21.5%
Gender Bonus Gap	20%	56%

Our pay and bonus gaps reflect the imbalance of men and women in different job levels, particularly in the lower levels, with women making up 71% and 68% of first and second quartile roles respectively.

Our bonus gap is further impacted by more women than men working part-time (84% of those working part-time and receiving a bonus were women) and women on maternity leave. In both these situations bonuses are pro-rated and therefore smaller than they would otherwise be. Likewise any new joiner in the year will receive a pro-rated bonus, of which 64% were women.

Our gender pay gap numbers are exaggerated as we are a smaller company, only 14 people over the reporting requirement. In larger organisations the impact is diluted as there is a larger number to measure the average across.

UKTV is an equal pay employer and pays fairly based on role and experience. We value all talented individuals and recruit, appoint and promote no matter the background or gender.
